Chateau de Bagatelle

On a wager with Marie Antoinette, in 1780, the Comte d'Artois (later Charles X, the second King of the Restoration), built an entrancing little chateau, with its charming gardens in the incredibly brief time of 64 days. The outlay was three million francs.

"C'est magnifique!", exclaimed Marie Antoinette, on catching her first glimpse of the beauty spot which became an enduring reminder of her wager. "Mais, non, c'est une bagatelle" answered the gallant Comte d'Artois. So in this romantic manner the name "Bagatelle" originated.

The gardens of the Chateau de Bagatelle, near Paris, were used as testing grounds to determine the value of new roses sent from all parts of the world, a most interesting place! So is the Bagatelle Nursery with its specimen evergreens, ornamental trees, Rhododendrons and new Azaleas. A cordial welcome awaits you.
